Livable Streets Community Tool Box

The Streetfilms in this toolbox share lessons in community-building and street design from around the world. But how can you make these changes in your own neighborhood? Each set of films represents a different type of tool or strategy you can use to help build livable streets with thriving communities. For more information and to find other great tools, visit us online at www.livablestreets.com.

Streetfilms produces videos that show how cities around the world are reclaiming their streets for pedestrians, cyclists, and transit riders.

Livable Streets Education helps classroom teachers and schools weave pertinent ideas about urban livability and advocacy into their curriculum.

StreetsWiki is a community-created encyclopedia where you can share best practices and information about transportation, urban environmental, and public space issues.

Livable Streets Community is a place to organize projects and campaigns in your neighborhood or city and connect with others who are doing the same.

Public Transportation is a key ingredient in any livable community. Innovations like BRT require that street space is properly allocated in order to function fully.

Traffic Calming Features are physical changes to the street and sidewalk fabric. They help ensure streets are safe and usable for all types of travelers.

Community Building & Public Spaces are essential in promoting safe and inclusive uses for our streets. Helping the public realize the potential of their streets is a great way to achieve community-driven change. See what great things happen when a streetscape is changed to better accommodate pedestrians, cyclists and transit riders.

Bicycles! Bicycles are not only fun, they’re healthy, cost-effective, and the most sustainable way to get from here to there. Bicycle infrastructure also helps to calm traffic, protect pedestrians, and fill the gaps where public transit doesn’t take you.
